Essential Functions: Contacts: Centralize your entire company's contacts in one place with listing by using this effective plug-in to draw Outlook contacts from each consumer into FileMaker. As details get joined into your FileMaker database during the time your customers' Outlook files are up to date. This allows your customers the capability to synchronize with their mobile devices like a Cell phone or iPhone. By using this plug-in your customers can become more effective through the eradication of dual access. Advertising The Outlook Manipulator plug-in enables FileMaker Pro to trade data with Microsoft Outlook Contacts, Calendar, Duties, Mail, Records and Log for the 'user\COs' default folder, open public and discussed files within the Swap Atmosphere.

outlook manipulator
